

What did the Oversight Committee do with the April 2018 recommendations from the experts?

The Oversight Committee (OC) met fourteen times since August 2017 to review information and to provide guidance and insight. On March 8 and 9, 2018 the group met in-person in Happy Valley-Goose Bay to review the recommendations and supplementary material produced by the IEC. A summary presentation was provided by the Chair and Research Director who also addressed questions and responded to requests for clarification. A consensus was reached on most recommendations but members asked for additional time and information to consider their decisions with respect to mitigation and to evaluate a suggestion by one of their members that consideration be given to an Impact Security Fund. The OC met several times over the next few weeks and produced a final set of recommendations that are described in a letter to the Ministers. That letter, as well as the opinions of individual representatives can be found [HERE](#).
